PROFILE

I am a front-end developer with experience building applications with JavaScript (ES6+), React, TypeScript, jQuery, HTML5, CSS3, SCSS and API integrations. My passion in bringing creative designs and ideas into life through programming motivates me to write codes that are clean, responsive and problem-solving.

PROJECTS

MODERNA IR SITE | LIVE

jQuery, CMS, SCSS, Figma

- Collaborated closely with implementation managers and product designers regarding layout, functionality and outstanding user interface interactions
- Developed highly scalable features using CMS and jQuery and matched website design as closely to the Figma design

WHAT DO YOU NO | LIVE | REPO

React, Firebase, HTML, CSS, Git, API Integration

- Used Datamuse API to fetch homophones of 10 words and asks user to match definition to the correct word
- Group programming among four developers to implement UI features using React and Firebase for backend

PLANTED | LIVE | REPO

HTML, SCSS, a11y, JavaScript

- Conversion of a PSD design into a pixel perfect multi-page website that that is fully responsive and accessible
- Notable implementations such as version controls via GitHub and BEM naming conventions
